STUDENTS' ATTACHMENT LOGBOOK

I. MISSION

The Adventist University of Central Africa (AUCA) is committed to provide Christ-centered quality education founded on a holistic approach that prepares people for the service of this life and the life to come.

II. VISION

The Adventist University of Central Africa (AUCA) is to be a Centre of excellence in undergraduate and graduate programs. Quality shall be the hallmark of all its undertaking including research and service delivery to its Students, Faculty, Staff and the Community at large.

III. INTRODUCTION

This book is to assist the student to keep record of the training. It will show the departments and sections in which the student has worked and the periods spent in each.

This is an industrial type of training to students in a business practical environment, which expose students with practical responsibilities as a business personnel or executive administrator, solving business problems while exhibiting skills and practice previously acquired. A minimum of 240 hours of 6 continuous weeks of Industrial Attachment / Practicum in a well and relevant established company / business environment is required. Students are expected to exhibit desirable attitude, good work habits, initiative, proper decorum developed through the course.

IV. DURATION OF THE ATTACHMENT:

The duration of the industrial attachment shall be between 6and8 weeks.

V. INSTRUCTION TO THE STUDENT

The attachment program is considered as two examinable units that the students are supposed to undertake and be examined. The whole exercise is marked out of 100 marks. i.e.
The Industry supervisor 30 marks, University supervisor 30 marks, Industrial attachment report 30marks and Log Book Presentation 10 marks.

VI. NOTICE OF RESUMPTION OF ATTACHMENT.

The student is supposed to notify the Attachment coordinator by filling a form provided regarding the details where he/she is attached. This should be communicated to the above within the first week of getting the attachment.

VII. DAILY REPORT

The daily work carried out during the period of training is to be recorded clearly with sketches and diagrams where applicable.

VIII. WEEKLY SUMMARY REPORT

This is a summary of the work done in a week and should cover a report of work covered. Students are required to present the logbook weekly to the industry-based supervisor for assessment of content and progress. The supervisor can use any page for his/her comments where necessary.

IX. CHANGE OF ATTACHMENT

A student is expected to start and finish his/ her attachment in one establishment. If it becomes necessary that he/she must change his/her place of attachment, the student should first secure permission in writing from the university. His/her application for change of place of attachment should indicate the name and address (not just post-office box) of the company or industry to which he/she wishes to transfer. Any attachment not properly authorized will be cancelled.

X. ATTACHMENT LOGBOOK

The logbook will be filled by the student at the end of every working day and should comprehensively indicate the tasks done and the skills learnt in that particular day. The logbook should be kept at the work place and MUST NOT be carried home.

XI. UNIVERSITY SUPERVISOR'S VISIT

The university supervisor will check the logbook when he/she visits the students to ensure that proper training is being received, and record his/her comment on the paper provided for that purpose, toward the end of the book.

XII. INDUSTRY BASED SUPERVISOR

The industry-based supervisor(s) will make comments on a weekly basis on the sheet of paper provided. This is to ensure that if the student is to rotate to several departments and units each unit supervisor will comment on the student performance.

XIII. EXPECTED OUTCOME

At the end of this training, students or trainee is expected to have gain experience and grasped the job or business core methods, procedures and techniques.

Major objective of the attachment exercise is to gain practical exposure of a business practical environment and practice with responsibilities as a business personnel or executive administrator, solving business problems while exhibiting skills and practice previously acquired (. Adjust according to your faculty)

Students are expected to exhibit desirable attitude, good work habits, initiative, proper decorum developed through the training. Trainees will also be required to keep a daily record of activities as per the format provided

and to be presented at the end of the attachment exercise. This can be included in the student's report as one of the attachments.

XIV. EXPECTED OUTPUT

The Industrial attachment is expected to have multi-dimensional benefits looking at students, the Adventist University of Central Africa, and the University partners / Attachment organizations.

Students

1. Will acquire new knowledge and practical experiences
2. Will improve his confidence in problem solving
3. Will have opportunity to relate with different categories of people likely to be met in the real-life situation
4. Will gain exposure to the demands and challenges of the workplace
5. Will get opportunity to meet a work with potential employers
6. Will have improved appreciation of the profession and therefore better work

AUCA.

1. Will get opportunity to appreciate client demands and the quality of graduates required to fulfill these demands
2. As a result of cooperation, the potential for research will be enhanced and developed with the various partners
3. Will get opportunity to access training and resources that are not available at AUCA

University partners / Attachment Organization.

1. Will get opportunity to be involved in the training and review of our programmes
2. Will be exposed to a pool of potential employees from which to select. This will ultimately reduce on the costs of recruitment and induction / orientation of new employees
3. Will get additional Human Resources for effective and efficient service delivery

XV. COURSE WORK AND PROCEDURES Expectations from Students (Roles and Responsibilities)

In this exercise students are expected to identify an organization / company / institution in his or her career. He or she will then apply for Industrial Attachment / Practicum following all requirements of the organization / company / institution. A student applying for Industrial Attachment / Practicum will be issued a recommendation letter which will be submitted together with his or her application to the organization / company / institution.

If accepted, a student is expected to produce an acceptance letter from the organization / company / institution to his or her department and a copy to the School of Business Industrial Attachment / Practicum Coordinator. A student will also be required to submit the physical address to his or her department and a copy to the School of Business Industrial Attachment / Practicum Coordinator.

A student has to make sure that he / she is fully registered before commencing the industrial training exercise. The procedure for registration and the fee amounts will be provided by the registrar's office.

A student should attend the School of Business Industrial Attachment / Practicum Orientation to be organized Industrial Attachment / Practicum School Coordinator. The said orientation program will be announced and take place in a semester before the Industrial Attachment / Practicum period. All industrial students are expected to attend without fail. Issues to be discussed will include presentation of this Industrial Attachment / Practicum outline and clarification on the issues such as

1. Registration
2. Payment of fees
3. Industrial Attachment / Practicum Instruments
4. Report format
5. Daily Record Keeping (Daily Record Sheet will be provided)
6. Grading structure and procedure
7. AOB

The students should attain the minimum attendance hours that as set per the industrial attachment requirements. Any student who fails to fulfill this requirement will either be referred or will be requested to redo the course/internship.

1. Take field attachment as part and parcel of their training at AUCAand have positive attitude towards learning by practice
2. Respect all field supervisors and any other persons they interact with throughout their field attachment period regardless of their background training and economic differentiation
3. Work willingly wherever they are posted/attached
4. Adhere to the field attachment code of conduct
5. Provide report and other forms of feedback to the University and the host partners
6. A student will be required to submit a draft report at the end of attachment report to the field supervisor for review and endorsement before final submission to their lecturers or staff from the school of Business. The organization / company / institution shall retain a copy of the final report and the original shall be submitted to the School.
7. **Final Industrial or practicum Attachment Report:** Every student shall be required to produce a field attachment report at the end of the exercise to the faculty, which report should be checked and signed by the student himself or herself and both the Field and University Supervisors. It should be well written in good English and systematically organized as indicated in the Section IX on Page 5

8. Each student is advised to make enough copies of the log book forms for all the days and weeks of his or her Industrial or practicum Attachment period accordingly. (i.e. Form II for all the weeks & Form III for each day).

XVI. INDUSTRIAL ATTACHMENT ASSESSMENT

Students will undergo:

1. Progressive assessment throughout the course/attachment
2. Practical assessment
3. Final written assessment

Students will be required to attain a minimum of **75%** grade in order to qualify for graduation.

Grading Shall Consist of the Following

1	Field Supervisor Evaluation	30%
2	Student Report	30%
3	University Staff Evaluation	30%
4	Logbook	10%
	Total	100%

XVII. FIELD SUPERVSIOR EVALUATION

The following are some of the attributes where a student will be evaluated by the field supervisor while on Industrial Attachment / Practicum. An Industrial Attachment / Practicum Appraisal form is provided in this booklet (Appraisal Form2) to evaluate the student on the following:

- Knowledge of the job
- Quality of work
- Quantity of work
- Attitude
- Judgment
- Reliability
- Attendance and Punctuality
- Flexibility -adaptability
- Personal characteristics.

An Industrial Attachment / Practicum Appraisal Forms is attached for both self and supervisors Appraisals

XVIII. UNIVERSITY STAFF EVALUATION

A staff from the University, who will visit the trainee in the field or workplace, will assess the student and give the overall progress, performance, quality of the student's report and the relevancy of the training.

This assessment will be subjected to interactions between the staff from the university and the field supervisor; and from his or her interview with the trainee. In this, the staffs from the university will possibly have a look at the exact jobs done by the trainee as will be permitted by the organization / company / institution where the trainee is attached.

XIX. STUDENT'S REPORT

Preliminary pages

Cover page: The cover page should include the following: Name of the University, School, Title of the document; a place where it is done; Course Code; Submitted to the faculty of in partial fulfillment of the requirements for the degree of (state your programme) of AUCA name of the student, ID number, to whom you are submitting the report, and the date of submission

Name & Signature of Student: Norbert NDIKUMANA

Date: 16 October 2026

Name & sign of field supervisor: Gilbert NDAYISENGA

Date: 16 October 2026

Name & sign of University supervisor .....Date: 16 October 2026

Stamp & Date .....(See table 1 on the next page).

Table of Contents - This should show the contents of the report by sections and sub-sections with the page numbers on which such content is found in the report.

i. **Acknowledgement**: The student should acknowledge those who contributed the successful completion of his / her industrial attachment / practicum

ii. **List of figures:** Every figure in the report should have its caption at its bottom, and such captions should be listed here with the page numbers on which the respective figures are found / indicated, such figures shall be numbered indicating their titles, and the numbering should follow the section numbers
e.g figure 2 1. meaning figure 1 in Section 2.

iii. **List of table:** All tables should be numbered and headed just like figures above, and listed on the their full meaning reflected / given

iv. **List of acronyms / Abbreviations:** Abbreviation and acronyms used in the report should be listed and

their full meaning reflected / given.

Example of the cover page.

13th July to 23rd September, 2026

XX. THE MAIN REPORT

This should be arranged in sections and presented coherently with maturity in the way and style of writing. The different sections should include:

1. INTRODUCTION

Give a brief description of your field report indicating what it is about place of attachment and period, and what the report presents/ covers in order to give direction to the reader. The following should not miss from your introduction

1. **Major objective of the attachment exercise. i.e.** to gain practical exposure of a business practical environment and practice with responsibilities as a business personnel or executive administrator, solving business problems while exhibiting skills and practice previously acquired. Remember students are expected to exhibit desirable attitude, good work habits, initiative, proper decorum developed through the training.
2. Name of the company your attached to; its location, postal and physical address
3. Type or line of business /services rendered / Activities/business carried out by the company
4. Historical background of the company.
5. Mission, Vision, and Values etc. of the company you attached to.

2. CORE BUSINESS

1) Indicate the department attached to and your job description or what you are/were doing (tasks given) during the period of Industrial Attachment / Practicum
2) Indicate the time record (Date when began your Industrial Attachment / Practicum and date when

finished Industrial Attachment / Practicum. (Specify the period of work)

3) Report the routine program in relation to how the company does its activities / sequences of activities you are assigned each day.
4) The organization's strength, weakness, opportunity and threat or challenges faced by the organization and how they manage to overcome them especially in your department.

3. SELF EVALUATION REPORT (SWOT ANALYSIS)

In this section, the student is expected to write the following:

a) What you liked most in your work and why.

b) Challenges faced by you during this attachment and how you overcame them.
c) What you disliked most in your work and why.
d) Areas of strength in the academic program done at school in relation to the work that you have been doing.
e) Areas of weakness in the academic program done at school in relation to the work that you have been doing.
f) Practical application of the knowledge learnt at school
g) Where do you think the current program offered at school can be strengthened, improved or maintained?
h) Enumerate and briefly explain what you have learnt during the entire period of the Industrial Attachment / Practicum
i) Any other important information you would like your field trainers to know and what you want us (the school) to know.

4. CONCLUSION:

The conclusion should include lesson learnt

5. REFERENCES

All cited sources of information / material used in the field attachment report should be listed using academically acceptable style (either American Psychological association (APA).

6. APPENDICES

Any other additional relevant and acceptable documents you have referred to in you report. This section could also include material providing further information to the report should be appended and labeled according. These could be filled log book, tables, photographs, charts, demos etc.

XXI. INDUSTRIAL ATTACHMENT /PRACTICUM FORMS

Instructions on how to use the Industrial Attachment / Practicum forms (Instruments)

1. **LOG FORM I**: This form serves as the first page of the Industrial Attachment / Practicum Students' Weekly Log Book. It is to be filled by the trainee. On this form the trainee will be required to give his/her personal information (Bio-data).

2. **LOG FORM II:** This is a weekly summary report. It is to be filled by the trainee on a daily basis. On this form, a trainee is required to give a brief description of his/her work/activity performed. He or she will record time in and time out (total hours worked in a day); he/she will also outline the challenges faced and lessons learnt for the day. At the end of the week, after compiling the total hours of the week, this form will then be signed by the trainee and the trainer.

3. **LOG FORM III:** This will be used by the trainee to give daily detailed description of work done as outlined in LOG FORM II. The trainee will be required to describe the job sequence of operations; tools or equipment used; task completed; task in progress, next day's work; problems and challenges faced; and give his/her (trainee's) recommendations. The trainee will always present this filled from to the trainer/field supervisor for comments. It will then be signed by both the trainee and the trainer/field supervisor.
4. **APPRAISAL FORM 1*(Self-Evaluation Form)*:** This form will be used by the trainee to appraise him or herself. For each attribute or factor, he/she will be required to circle the points that best describe his/her judgment and/or how he/she (trainee) evaluates himself or herself from the provided scales. All the points will be added and the total score to be filled in the space provided. The trainee will then be required to return this appraisal form to the university supervisor on his/her visitation.

5. **APPRAISAL FORM 2*(Industrial Attachment Appraisal form)*:** This form will be used by the trainer to appraise the apprentice (trainee). For each attribute or factor, the trainer will be requested to circle the points that best describe his/her judgment and/or your satisfaction from the provided scales. All the points will then be added to get the total score to be filled in the space provided. This appraisal form will be return after endorsement by the field supervisor's signature and with an official stamp to the university supervisor on his/her visitation.

6. **FACULTY REPORT FORM 1 & 2:** These forms will be used by the university supervisor on his/her visitation as part of his/her end of industrial attachment supervision report. The university supervisor may let the trainee fill the items 1 & 2 on the Faculty Report Form 1. The university supervisor will then fill the rest of items guided by his/her interview (interactions) with the field supervisor(s). This has to be signed by the university supervisor before returning it to the relevant department.

XXII. FURTHER POINTS TO NOTE/INSTRUCTIONS

Ethical code of conduct: A trainee is expected to present himself or herself in a respectable, decent and professionals' manner at all times during the training / attachment official hours.

Dress code: A trainee is also expected to dress decently (females – the dress should not be above knee level, no see-through, no shorts and no tight trousers; while for males – sandals necklaces, ear rings and bangles are not acceptable).

Late submission of report: illness may not always be a sufficient reason to delay submission. Neither are problems with a computer, printer or disk. Students are expected to plan for contingencies in their work schedule. Serious illness and exceptional individual difficult circumstances may be accepted as reasons for late work but NOTIFICATIONS MUST BE RECEIVED 2 DAYS BEFORE THE SUBMISSION
DEADLINE. Last minute problems may be at the discretion of the lecturer.

Cheating/Copying: individual work turned in for credit must be the student's own work. Cheating in the form of turning in work that is not your own or copying of any form will not be tolerated and will result in automatic failure of the Industrial Attachment / Practicum.

On request, students failing from a report may be given one opportunity of doing another set piece of work in the same period or semester. The maximum available grade for this second piece of work is **70%.**

XXIII. STUDENT DECLARATION /CONCENT

I Norbert NDIKUMANA

I declare that I have read and understood the contents of this form and I agree to abide by the guidelines stipulated there in.

Second Weekly Summary Report

Week No.....2..... Month ...1... Date From 20/07/2026 To: 24/07/2026

Days	**Brief Description of work/activity performed**	**Time In**	**Time Out**	**Total Hours**	**Lessons Learnt**	**Challenges Faced**
Mon 20/07/2026	Designed the PostgreSQL schema for the Project Review System	9am	5pm	8hrs	Learned to map a paper workflow onto relational entities	Mapping the paper-based workflow onto database entities required several iterations with the supervisor
Tue 21/07/2026	Implemented JPA entities and repositories	9am	5pm	8hrs	Learned when a type deserves its own table versus an embeddable	Understanding the difference between @Entity and @Embeddable took time; resolved through documentation and experimentation
Wed 22/07/2026	Built JWT authentication with role-based access control	9am	5pm	8hrs	Learned how stateless JWT authentication and refresh flows work	JWT token refresh logic was complex; expired tokens had to be handled gracefully
Thu 23/07/2026	Implemented emailed multi-factor authentication for sign-in	9am	5pm	8hrs	Learned SMTP configuration and app-password based mail sending	Configuring Gmail SMTP required an App Password; the first configuration had SSL certificate issues
Fri 24/07/2026	Wrote unit tests for the authentication service	9am	5pm	8hrs	Learned the value of test-driven confidence in security code	Mocking the Spring Security context required extra setup with @WithMockUser
Total Hours in a week				**40hrs**		

Signature of Field Supervisor: **Signature of Student**

Gilbert NDAYISENGA Norbert NDIKUMANA

Daily Detailed Description of work

Week No.....3..... Day...1... Month ...1. .... Date: 27/07/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment,**
1.	Tasks completed: Built the project submission API: CRUD endpoints for creating, reading, updating and deleting water resource projects with full validation	Laptop, VS Code, Postman
2.	Tasks in progress: Implementing the file upload service	Laptop, VS Code, Postman
3.	Next day's tasks: Implemented the multi-format file upload service	Laptop, VS Code, Postman
4.	Problems / challenges: Handling file uploads (PDF, DOCX) with multipart form data required careful stream management to avoid memory issues	Laptop, VS Code, Postman
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....3..... Day...2... Month ...1. .... Date: 28/07/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Implemented the file upload service supporting PDF, Word, Excel and ZIP files, with size validation and virus-scanning hooks	Laptop, VS Code, Postman
2.	Tasks in progress: Starting the React frontend project	Laptop, VS Code, Postman
3.	Next day's tasks: Created the React frontend and set up routing	Laptop, VS Code, Postman
4.	Problems / challenges: The 'only the submitting company may attach files' rule required role and ownership checks in the service layer	Laptop, VS Code, Postman
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....3..... Day...3... Month ...1. .... Date: 29/07/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Created the React frontend project with Vite; set up TailwindCSS, React Router and the authentication context	Laptop, VS Code
2.	Tasks in progress: Designing the Sign In page	Laptop, VS Code
3.	Next day's tasks: Designed and implemented the Sign In page	Laptop, VS Code
4.	Problems / challenges: Configuring the Vite proxy for API calls to the Spring Boot backend required careful CORS configuration	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....3..... Day...4... Month ...1. .... Date: 30/07/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Designed and implemented the Sign In page with its two-column layout, gradient left panel and animated right panel with floating shapes	Laptop, VS Code, Figma
2.	Tasks in progress: Building the registration page	Laptop, VS Code, Figma
3.	Next day's tasks: Built the registration page with email verification	Laptop, VS Code, Figma
4.	Problems / challenges: CSS gradient animations consumed more resources than expected; optimised with will-change and reduced motion for accessibility	Laptop, VS Code, Figma
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....3..... Day...5... Month ...1.... Date: 31/07/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Built the registration page with email verification flow, password strength validation and organisation selection	Laptop, VS Code
2.	Tasks in progress: Connecting registration to the account approval workflow	Laptop, VS Code
3.	Next day's tasks: N/A (weekend)	Laptop, VS Code
4.	Problems / challenges: Coordinating frontend polling with backend MFA code generation timing was tricky	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Weekly Summary Report

Week No.....3..... Month ...1... Date: From27/07/2026 to 31/07/2026

Days	Brief Description of work/activity performed	Time In	Time Out	Total Hours	Lessons Learnt	Challenges Faced
Mon 27/07/2026	Built the project CRUD API endpoints	9am	5pm	8hrs	Learned multipart request handling in Spring Boot	Handling file uploads (PDF, DOCX) with multipart form data required careful stream management to avoid memory issues
Tue 28/07/2026	Implemented the multi-format file upload service	9am	5pm	8hrs	Learned to enforce business rules in the service layer, never only in the UI	The 'only the submitting company may attach files' rule required role and ownership checks in the service layer
Wed 29/07/2026	Created the React frontend and set up routing	9am	5pm	8hrs	Learned how dev-server proxies avoid CORS problems in development	Configuring the Vite proxy for API calls to the Spring Boot backend required careful CORS configuration
Thu 30/07/2026	Designed and implemented the Sign In page	9am	5pm	8hrs	Learned animation performance techniques and accessibility considerations	CSS gradient animations consumed more resources than expected; optimised with will-change and reduced motion for accessibility

Fri 31/07/2026	Built the registration page with email verification	9am	5pm	8hrs	Learned to design polling flows with clear timeouts and feedback	Coordinating frontend polling with backend MFA code generation timing was tricky
Total Hours in a week				**40hrs**		

Signature of Field Supervisor: **Signature of Student**

Gilbert NDAYISENGA Norbert NDIKUMANA

Daily Detailed Description of work

Week No.....4..... Day...1... Month ...2. .... Date: 03/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Built the dashboard layout with the AppShell component: sidebar navigation, header with notification bell and message icon, and the main content area	Laptop, VS Code
2.	Tasks in progress: Implementing role-based dashboard views	Laptop, VS Code
3.	Next day's tasks: Implemented role-based dashboard views	Laptop, VS Code
4.	Problems / challenges: Making the sidebar responsive across screen sizes required extensive media-query testing	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....4..... Day...2... Month ...2. .... Date: 04/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
1.	Tasks completed: Implemented role-based dashboard views so each role (Admin, DM, Reviewer, External) sees its own metric cards, charts and quick actions	Laptop, VS Code, Postman
2.	Tasks in progress: Creating the Project Track page	Laptop, VS Code, Postman
3.	Next day's tasks: Created the Project Track page with table and drawer	Laptop, VS Code, Postman
4.	Problems / challenges: Role-specific statistics required restructuring the API response to include role-aware data	Laptop, VS Code, Postman
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....4..... Day...3... Month ...2. .... Date: 05/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
7.	Tasks completed: Created the Project Track page with a sortable and filterable table, metric cards, status dropdown, search functionality and a slide-in detail drawer	Laptop, VS Code
8.	Tasks in progress: Building the review workflow	Laptop, VS Code
9.	Next day's tasks: Built the review workflow with queue and decisions	Laptop, VS Code
10.	Problems / challenges: The status dropdown had to offer only valid transitions per the state machine; mirroring those rules on the frontend was challenging	Laptop, VS Code
11.	Student's Recommendations: -	Laptop, Notepad
12.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....4..... Day...4... Month ...2. .... Date: 06/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
1	Tasks completed: Built the review workflow: a queue view for pending reviews, approve and return buttons with confirmation dialogs, and a table of decided projects	Laptop, VS Code
2	Tasks in progress: Preparing for the university supervisor's visit	Laptop, VS Code
3	Next day's tasks: University supervisor visit and progress demonstration	Laptop, VS Code
4	Problems / challenges: The confirmation dialog's gradient header, severity variants and branding required significant CSS work	Laptop, VS Code
5	Student's Recommendations: -	Laptop, Notepad
6	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....4..... Day...5... Month ...2. .... Date: 07/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: University supervisor visited; demonstrated progress, discussed the code architecture and received feedback on the project structure	Laptop, Browser Dev Tools, MS Word
2.	Tasks in progress: Fixing the UX issues raised during the demonstration	Laptop, Browser Dev Tools, MS Word
3.	Next day's tasks: N/A (weekend)	Laptop, Browser Dev Tools, MS Word
4.	Problems / challenges: Demonstrating the application live exposed UX issues in the drawer that needed immediate fixing	Laptop, Browser Dev Tools, MS Word
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Daily Detailed Description of work

Week No.....5..... Day...2... Month ...2. .... Date: 11/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Built the notifications system with a real-time unread badge, header bell and a dedicated notifications page with filter chips	Laptop, VS Code
2.	Tasks in progress: Creating the Messages page	Laptop, VS Code
3.	Next day's tasks: Created the Messages page with chat layout	Laptop, VS Code
4.	Problems / challenges: Updating the unread count without a page refresh required polling with use Effect and set Interval	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....5..... Day...3... Month ...2. .... Date: 12/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Created the Messages page with a two-pane chat layout, avatar-based conversation list and gradient message bubbles	Laptop, VS Code
2.	Tasks in progress: Implementing the App Management page for administrators	Laptop, VS Code
3.	Next day's tasks: Implemented the administrator App Management page	Laptop, VS Code
4.	Problems / challenges: Moving messages from the sidebar to a header icon required restructuring the AppShell navigation configuration	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....5..... Day...4... Month ...2. .... Date: 13/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Implemented the App Management page for administrators: user management, branding controls, email templates and system settings tabs	Laptop, VS Code, Figma
2.	Tasks in progress: Applying the global design system	Laptop, VS Code, Figma
3.	Next day's tasks: Applied the global design system across all pages	Laptop, VS Code, Figma
4.	Problems / challenges: Branding image upload with preview, reorder arrows and caption editing needed careful state management	Laptop, VS Code, Figma
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments

Fifth Weekly Summary Report

Week No.....5..... Month ...2.....Date: From 10/08/2026 to 14/08/2026

Days	Brief Description of work/activity performed	Time In	Time Out	Total Hours	Lessons Learnt	Challenges Faced
Mon 10/08/2026	Implemented the Reports page with Excel and PDF export	9am	5pm	8hrs	Learned browser-side export libraries and their limitations	jsPDF cannot render SVG directly, so html2canvas was used to capture chart screenshots
Tue 11/08/2026	Built the notifications system with live badge	9am	5pm	8hrs	Learned polling strategies for near-real-time interfaces	Updating the unread count without a page refresh required polling with useEffect and setInterval
Wed 12/08/2026	Created the Messages page with chat layout	9am	5pm	8hrs	Learned information-architecture trade-offs when relocating a feature	Moving messages from the sidebar to a header icon required restructuring the AppShell navigation configuration
Thu 13/08/2026	Implemented the administrator App Management page	9am	5pm	8hrs	Learned to manage complex multi-field form state	Branding image upload with preview, reorder arrows and caption editing needed careful state management

Fri 14/08/2026	Applied the global design system across all pages	9am	5pm	8hrs	Learned the value of design tokens over hardcoded values	Replacing five or more hardcoded blue shades across 14 files required careful search-and-replace with testing
Total Hours in a week				**40hrs**

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....6..... Day...2... Month ...2. .... Date: 18/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Added the external user submission form with province and district cascading dropdowns, project type selection (including 'Other' with free text) and a document type selector	Laptop, VS Code
2.	Tasks in progress: Implementing the resubmission workflow	Laptop, VS Code
3.	Next day's tasks: Implemented the rejected-project resubmission workflow	Laptop, VS Code
4.	Problems / challenges: The Rwandan administrative hierarchy (provinces, districts, sectors) required a comprehensive and accurate dataset	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....6..... Day...3... Month ...2. .... Date: 19/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment,**
1.	Tasks completed: Implemented the resubmission workflow so external users can update rejected projects and resubmit them with updated documents	Laptop, VS Code, Postman
2.	Tasks in progress: Building the admin dashboard	Laptop, VS Code, Postman
3.	Next day's tasks: Built the admin dashboard with audit monitoring	Laptop, VS Code, Postman
4.	Problems / challenges: Managing the REJECTED to RESUBMITTED transition required updating both the backend state machine and the frontend permissions	Laptop, VS Code, Postman
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....6..... Day...4... Month ...2. .... Date: 20/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
1.	Tasks completed: Built the admin dashboard with system-wide statistics, user activity monitoring, an audit log viewer and online-user indicators	Laptop, VS Code
2.	Tasks in progress: Adding language translations	Laptop, VS Code
3.	Next day's tasks: Added Kinyarwanda and French translations	Laptop, VS Code
4.	Problems / challenges: The real-time 'currently logged in' indicator required session tracking on the backend with heartbeat updates	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....6..... Day...5... Month ...2. .... Date: 21/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Implemented Kinyarwanda and French translations for the Sign In and Register pages with correct technical terminology	Laptop, VS Code, MS Word
2.	Tasks in progress: Verifying translated strings with a native speaker	Laptop, VS Code, MS Word
3.	Next day's tasks: N/A (weekend)	Laptop, VS Code, MS Word
4.	Problems / challenges: Accurate Kinyarwanda terms required native-speaker verification; one mistranslation of 'digit' had to be corrected	Laptop, VS Code, MS Word
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Sixth Weekly Summary Report

Week No.....6..... Month ...2..... Date: From 17/08/2026 to 21/08/2026

Days	Brief Description of work/activity performed	Time In	Time Out	Total Hours	Lessons Learnt	Challenges Faced
Mon 17/08/2026	Implemented the project detail page and viewer	9am	5pm	8hrs	Learned in-browser document rendering with PDF.js	Embedding PDF.js for the in-app document viewer and handling CORS for file downloads took careful configuration
Tue 18/08/2026	Built the submission form with cascading location dropdowns	9am	5pm	8hrs	Learned cascading-dropdown data modelling for geographic hierarchies	The Rwandan administrative hierarchy (provinces, districts, sectors) required a comprehensive and accurate dataset
Wed 19/08/2026	Implemented the rejected-project resubmission workflow	9am	5pm	8hrs	Learned state-machine enforcement across backend and frontend	Managing the REJECTED to RESUBMITTED transition required updating both the backend state machine and the frontend permissions
Thu 20/08/2026	Built the admin dashboard with audit monitoring	9am	5pm	8hrs	Learned session heartbeat design for presence indicators	The real-time 'currently logged in' indicator required session tracking on the backend with heartbeat updates

Fri 21/08/2026	Added Kinyarwanda and French translations	9am	5pm	8hrs	Learned internationalisation discipline: never translate technical terms blind	Accurate Kinyarwanda terms required native-speaker verification; one mistranslation of 'digit' had to be corrected
Total Hours in a week				**40hrs**		

Signature of Field Supervisor: **Signature of Student**

Gilbert NDAYISENGA Norbert NDIKUMANA

Date: 21/08/2026

Daily Detailed Description of work

Week No.....7..... Day...1... Month ...2. .... Date: 24/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Implemented the reusable Confirm Dialog component with gradient header, RWB logo, severity-based icons and danger, warning and success variants	Laptop, VS Code
2.	Tasks in progress: Wiring Confirm Dialog into destructive actions	Laptop, VS Code
3.	Next day's tasks: Wired Confirm Dialog into all destructive actions	Laptop, VS Code
4.	Problems / challenges: The glass morphism effect needed vendor prefixes and fallback solid backgrounds to work across browsers	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....7..... Day...2... Month ...2. .... Date: 25/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
1.	Tasks completed: Wired the Confirm Dialog into every destructive action: user disable and delete, project reject and archive, branding image delete and review reassignment	Laptop, VS Code
2.	Tasks in progress: Applying the ocean gradient theme to the sidebar	Laptop, VS Code
3.	Next day's tasks: Applied the ocean gradient sidebar and loading skeletons	Laptop, VS Code
4.	Problems / challenges: Each action needed its own severity variant and consequence message, which required careful prop management	Laptop, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....7..... Day...3... Month ...2. .... Date: 26/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Applied the ocean gradient to the sidebar to match the login page, added animated shimmer loading skeletons and polished back buttons with hover gradients	Laptop, VS Code, Figma
2.	Tasks in progress: Making every page responsive	Laptop, VS Code, Figma
3.	Next day's tasks: Made all pages responsive across devices	Laptop, VS Code, Figma
4.	Problems / challenges: The sidebar gradient overrode the theme color picker; gradient consistency was chosen over per-user color customization	Laptop, VS Code, Figma
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....7..... Day...4... Month ...2. .... Date: 27/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
1.	Tasks completed: Implemented responsive design across all pages: stat cards stack on mobile, tables scroll, the sidebar collapses and filter pills scroll horizontally	Laptop, Browser Dev Tools
2.	Tasks in progress: Preparing for the second university supervisor visit	Laptop, Browser Dev Tools
3.	Next day's tasks: Second university supervisor visit and full demonstration	Laptop, Browser Dev Tools
4.	Problems / challenges: Testing at five or more breakpoints was time-consuming; the Chrome DevTools device toolbar helped extensively	Laptop, Browser Dev Tools
5.	Student's Recommendations: -	Laptop, Notepad
	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....7..... Day...5... Month ...2. .... Date: 28/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
	Tasks completed: Second university supervisor visit; demonstrated the complete application including all role views, the review workflow and the branding management features	Laptop, Browser Dev Tools, MS Word
	Tasks in progress: Acting on the feedback about chart visualization	Laptop, Browser Dev Tools, MS Word
	Next day's tasks: N/A (weekend)	Laptop, Browser Dev Tools, MS Word
	Problems / challenges: Feedback that donut charts showing 0% look broken rather than informative; noted for the next sprint	Laptop, Browser Dev Tools, MS Word
	Student's Recommendations: -	Laptop, Notepad
	Field supervisor's comments	

Signature of Field Supervisor:

Daily Detailed Description of work

Week No.....8..... Day...1... Month ...2. .... Date: 31/08/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
	Tasks completed: Fixed the donut chart data bug so the ring displays actual project status counts instead of 0% when data exists	Laptop, VS Code
	Tasks in progress: Standardizing chart scales and colors	Laptop, VS Code
	Next day's tasks: Standardized chart scales and status color tokens	Laptop, VS Code
	Problems / challenges: Recharts renders SVG arcs differently per dataset; the single-item edge case needed special handling	Laptop, VS Code
	Student's Recommendations: -	Laptop, Notepad
	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....8..... Day...2... Month ...3.... Date: 01/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
	Tasks completed: Added a y-axis scale to the bar charts, standardized status color tokens across all pages and fixed color drift between status chips on different panels	Laptop, VS Code
	Tasks in progress: Improving the branding management tab	Laptop, VS Code
	Next day's tasks: Improved branding tab CRUD and feedback	Laptop, VS Code
	Problems / challenges: Using the same hex value everywhere required a codebase-wide replacement of hardcoded colors with CSS variables	Laptop, VS Code
	Student's Recommendations: -	Laptop, Notepad
	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....8..... Day...3... Month ...3. .... Date: 02/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment,**
	Tasks completed: Improved the branding tab: delete confirmation dialog, reorder with toast feedback, image upload with size guidance and a slide-limit indicator	Laptop, VS Code
	Tasks in progress: Pushing the project to GitHub	Laptop, VS Code
	Next day's tasks: Pushed the project to GitHub with documentation	Laptop, VS Code
	Problems / challenges: Drag-to-reorder was considered but deferred in favour of simpler arrow buttons given the time constraint	Laptop, VS Code
	Student's Recommendations: -	Laptop, Notepad
	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....8..... Day...4... Month ...3. .... Date: 03/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment,**
	Tasks completed: Pushed the complete project to the GitHub repository and created a README with setup instructions, an architecture overview and screenshots	Laptop, VS Code, Git
	Tasks in progress: Running final end-to-end tests	Laptop, VS Code, Git
	Next day's tasks: Ran final testing and fixed remaining bugs	Laptop, VS Code, Git
	Problems / challenges: The initial push failed on large image files; resolved by using Git LFS for binary assets	Laptop, VS Code, Git
	Student's Recommendations: -	Laptop, Notepad
	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....8..... Day...5... Month ...3. .... Date: 04/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment, etc**
	Tasks completed: Final testing and bug fixes: verified all CRUD operations, role-based access, email verification and language switching across every page	Laptop, Browser Dev Tools, Postman
	Tasks in progress: Starting the final attachment report	Laptop, Browser Dev Tools, Postman
	Next day's tasks: N/A (weekend)	Laptop, Browser Dev Tools, Postman
	Problems / challenges: A race condition was found in the notification badge count and fixed with denounced API calls	Laptop, Browser Dev Tools, Postman
	Student's Recommendations: -	Laptop, Notepad
	Field supervisor's comments

Weekly Summary Report

Week No.....8..... Month ...3.....Date: 04/09/2026

Days	Brief Description of work/activity performed	Time In	Time Out	Total Hours	Lessons Learnt	Challenges Faced
Mon 31/08/2026	Fixed the donut chart data-display bug	9am	5pm	8hrs	Learned to handle chart edge cases defensively	Recharts renders SVG arcs differently per dataset; the single-item edge case needed special handling
Tue 01/09/2026	Standardised chart scales and status colour tokens	9am	5pm	8hrs	Learned token-based theming end to end	Using the same hex value everywhere required a codebase-wide replacement of hardcoded colours with CSS variables
Wed 02/09/2026	Improved branding tab CRUD and feedback	9am	5pm	8hrs	Learned to scope features to the time available	Drag-to-reorder was considered but deferred in favour of simpler arrow buttons given the time constraint
Thu 03/09/2026	Pushed the project to GitHub with documentation	9am	5pm	8hrs	Learned Git LFS for version-controlling binaries	The initial push failed on large image files; resolved by using Git LFS for binary assets

Fri 04/09/2026	Ran final testing and fixed remaining bugs	9am	5pm	8hrs	Learned systematic end-to-end test passes before release	A race condition was found in the notification badge count and fixed with debounced API calls
Total Hours in a week				**40hrs**

Date: 04/09/2026

Daily Detailed Description of work

Week No.....9..... Day...1... Month ...3. .... Date: 07/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Drafted the final industrial attachment report: introduction, host organization background, core business and task description sections	Laptop, MS Word
2.	Tasks in progress: Adding screenshots and figures of the system	Laptop, MS Word
3.	Next day's tasks: Documented tasks and inserted system screenshots	Laptop, MS Word
4.	Problems / challenges: Summarising several weeks of work into a coherent report required careful reflection and organisation	Laptop, MS Word
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....9..... Day...2... Month ...3. .... Date: 08/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Continued the report: documented the task descriptions per week and inserted labelled screenshots of the finished system	Laptop, MS Word
2.	Tasks in progress: Reviewing the logbook for completeness	Laptop, MS Word
3.	Next day's tasks: Reviewed and updated all logbook entries	Laptop, MS Word
4.	Problems / challenges: Choosing which system screens best demonstrated the work took several iterations	Laptop, MS Word
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....9..... Day...3... Month ...3. .... Date: 09/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Reviewed and updated every logbook week for completeness and consistency, cross-checking dates and hours against the Git commit history	Laptop, MS Word
2.	Tasks in progress: Preparing the system handover documentation	Laptop, MS Word
3.	Next day's tasks: Prepared system handover documentation	Laptop, MS Word
4.	Problems / challenges: Some early weeks lacked detail and had to be reconstructed from Git history	Laptop, MS Word
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....9..... Day...4... Month ...3. .... Date: 10/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Prepared the system handover documentation: environment setup guide, configuration reference, user management guide and backup procedure	Laptop, MS Word
2.	Tasks in progress: Training the ICT staff	Laptop, MS Word
3.	Next day's tasks: Trained ICT staff on system administration	Laptop, MS Word
4.	Problems / challenges: Some configuration values existed only in the development environment and had to be documented for production	Laptop, MS Word
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Daily Detailed Description of work

Week No.....9..... Day...5... Month ...3. .... Date: 11/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Trained the ICT team on system administration: deployment, user management, branding management and database backups	Laptop, MS Word
2.	Tasks in progress: Finalizing the internship report	Laptop, MS Word
3.	Next day's tasks: N/A (weekend)	Laptop, MS Word
4.	Problems / challenges: Transferring tacit knowledge gained over the attachment in a single short session	Laptop, MS Word
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments

Ninth Weekly Summary Report

Week No.....9..... Month ...3.....Date: From 07/09/2026 to 11/09/2026

Days	Brief Description of work/activity performed	Time In	Time Out	Total Hours	Lessons Learnt	Challenges Faced
Mon 07/09/2026	Drafted the final attachment report	9am	5pm	8hrs	Learned structured technical report writing	Summarising several weeks of work into a coherent report required careful reflection and organisation
Tue 08/09/2026	Documented tasks and inserted system screenshots	9am	5pm	8hrs	Learned that evidence (figures) makes a report credible	Choosing which system screens best demonstrated the work took several iterations
Wed 09/09/2026	Reviewed and updated all logbook entries	9am	5pm	8hrs	Learned the value of keeping daily records while the work is fresh	Some early weeks lacked detail and had to be reconstructed from Git history
Thu 10/09/2026	Prepared system handover documentation	9am	5pm	8hrs	Learned to document configuration, not just code	Some configuration values existed only in the development environment and had to be documented for production

Fri 11/09/2026	Trained ICT staff on system administration	9am	5pm	8hrs	Learned that teaching a system reveals gaps in your own understanding	Transferring tacit knowledge gained over the attachment in a single short session
Total Hours in a week				**40hrs**

Date: 11/09/2026

Daily Detailed Description of work

Week No.....10..... Day...1... Month ...3. .... Date: 14/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Added per-column filter bars inside the shared Table component: each column header gains a dropdown of the distinct values present, with chips for active filters and independent multi-column filtering	Laptop, VS Code
2.	Tasks in progress: Testing the filters on every screen that reuses the table	Laptop, VS Code
3.	Next day's tasks: Improved user creation with auto-select and permission preview	Laptop, VS Code
4.	Problems / challenges: Combining many column filters without slowing table re-renders required keeping the filter logic in one shared component	Laptop, VS Code
5.	Student's Recommendations: Document the shared component API so future pages use it correctly	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....10..... Day...2... Month ...3. .... Date: 15/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Improved user creation so the role's main functionality is selected automatically, additional permissions appear as optional additions, and a permission preview shows exactly what the user will be able to do	Laptop, VS Code, Postman
2.	Tasks in progress: Applying the same preview to the role-assignment dialog	Laptop, VS Code, Postman
3.	Next day's tasks: Configured and tested the forgot-password flow	Laptop, VS Code, Postman
4.	Problems / challenges: Deriving the exact permission list per role required reading the backend permission matrix rather than hardcoding it	Laptop, VS Code, Postman
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....10..... Day...3... Month ...3. .... Date: 16/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Configured the forgot-password flow end to end: reset request by email, one-time code verification and password update, then tested each step against the API	Laptop, VS Code, Postman, Mail
2.	Tasks in progress: Verifying the reset flow from the user interface	Laptop, VS Code, Postman, Mail
3.	Next day's tasks: Hardened the DM rejection guard and fixed layout spacing	Laptop, VS Code, Postman, Mail
4.	Problems / challenges: The reset endpoint returned 404 until the backend JAR was rebuilt; the running JAR had to be stopped first	Laptop, VS Code, Postman, Mail
5.	Student's Recommendations: Always rebuild and restart the backend after adding endpoints	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....10..... Day...4... Month ...3. .... Date: 17/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Hardened the review workflow so a Division Manager cannot make a final rejection before a reviewer's internal decision: guard added in the service layer, buttons disabled in the project detail and queue screens; also added consistent 1 cm content spacing to the layout	Laptop, VS Code, Postman
2.	Tasks in progress: Running regression checks on the workflow	Laptop, VS Code, Postman
3.	Next day's tasks: Prepared production builds and completed documentation	Laptop, VS Code, Postman
4.	Problems / challenges: The rule had to be enforced in three layers (service guard, project detail, reviews queue) so the API and UI could not disagree	Laptop, VS Code, Postman
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....10..... Day...5... Month ...3. .... Date: 18/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment,**
1.	Tasks completed: Prepared deployment: production build of the backend JAR and frontend bundle, environment configuration checklist, and completed the internship report and the system master-flow documentation	Laptop, MS Word, VS Code
2.	Tasks in progress: Waiting for the deployment window	Laptop, MS Word, VS Code
3.	Next day's tasks: N/A (weekend)	Laptop, MS Word, VS Code
4.	Problems / challenges: Secrets and ports differ between development and production; the checklist caught several mismatches	Laptop, MS Word, VS Code
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Tenth Weekly Summary Report

Week No.....10..... Month ...3.....Date: From 14/09/2026 to 18/09/2026

Days	Brief Description of work/activity performed	Time In	Time Out	Total Hours	Lessons Learnt	Challenges Faced
Mon 14/09/2026	Added per-column filter bars to the shared Table	9am	5pm	8hrs	Learned to build a feature once in a shared component so every screen inherits it	Combining many column filters without slowing table re-renders required keeping the filter logic in one shared component
Tue 15/09/2026	Improved user creation with auto-select and permission preview	9am	5pm	8hrs	Learned role modelling: defaults versus explicit additions	Deriving the exact permission list per role required reading the backend permission matrix rather than hardcoding it
Wed 16/09/2026	Configured and tested the forgot-password flow	9am	5pm	8hrs	Learned that stale builds hide new endpoints	The reset endpoint returned 404 until the backend JAR was rebuilt; the running JAR had to be stopped first
Thu 17/09/2026	Hardened the DM rejection guard and fixed layout spacing	9am	5pm	8hrs	Learned defence in depth for business rules	The rule had to be enforced in three layers (service guard, project detail, reviews queue) so the API and UI could not disagree

Fri 18/09/2026	Prepared production builds and completed documentation	9am	5pm	8hrs	Learned environment-parity checklists prevent deployment surprises	Secrets and ports differ between development and production; the checklist caught several mismatches
Total Hours in a week				**40hrs**		

Signature of Field Supervisor: **Signature of Student**

Gilbert NDAYISENGA Norbert NDIKUMANA

Daily Detailed Description of work

Week No.....11..... Day...1... Month ...3. .... Date: 21/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Prepared the final production builds (backend JAR and frontend bundle), reviewed the production environment settings and backed up the development database	Laptop, VS Code, PostgreSQL
2.	Tasks in progress: Ready to deploy to the production server	Laptop, VS Code, PostgreSQL
3.	Next day's tasks: Deployed backend, frontend and database to production	Laptop, VS Code, PostgreSQL
4.	Problems / challenges: Configuration values that worked locally had to be re-checked for the production environment	Laptop, VS Code, PostgreSQL
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....11..... Day...2... Month ...3. .... Date: 22/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Deployed the backend, frontend and database to the production server: configured the production environment settings (database connection, email service, application properties), ran the database scripts and began verifying the deployed system	Laptop, VS Code, PostgreSQL
2.	Tasks in progress: Testing and verification of the deployed system	Laptop, VS Code, PostgreSQL
3.	Next day's tasks: Tested the live system and handed it over to ICT	Laptop, VS Code, PostgreSQL
4.	Problems / challenges: Settings that worked on the development machine had to be adjusted for the production environment	Laptop, VS Code, PostgreSQL
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Daily Detailed Description of work

Week No.....11..... Day...3... Month ...3. .... Date: 23/09/2026

Sequence of Operation for job		
No.	**Operation**	**Tool, Equipment**
1.	Tasks completed: Tested the live system (sign-in, email verification codes, project submission and the review workflow) across all four roles, fixed minor configuration issues, handed the system over to the ICT team and the supervisor, then submitted the workstation and returned all equipment	Laptop, Browser Dev Tools
2.	Tasks in progress: N/A (end of attachment)	Laptop, Browser Dev Tools
3.	Next day's tasks: N/A (end of attachment)	Laptop, Browser Dev Tools
4.	Problems / challenges: Some configuration issues only appeared after deployment and had to be fixed and re-tested	Laptop, Browser Dev Tools
5.	Student's Recommendations: -	Laptop, Notepad
6.	Field supervisor's comments	

Signature of Field Supervisor:

Gilbert NDAYISENGA

Eleventh Weekly Summary Report

Week No.....11..... Month ...3..... Date: From 21/09/2026 to 23/09/2026

Days	Brief Description of work/activity performed	Time In	Time Out	Total Hours	Lessons Learnt	Challenges Faced
Mon 21/09/2026	Prepared production builds and database backup	9am	5pm	8hrs	Learned that a deployment checklist prevents avoidable outages	Configuration values that worked locally had to be re-checked for the production environment
Tue 22/09/2026	Deployed backend, frontend and database to production	9am	5pm	8hrs	Learned how a system moves from development to production	Settings that worked on the development machine had to be adjusted for the production environment
Wed 23/09/2026	Tested the live system and handed it over to ICT	9am	5pm	8hrs	Learned the importance of post-deployment testing and formal handover	Some configuration issues only appeared after deployment and had to be fixed and re-tested
Total Hours in a week				**24hrs**		

Signature of Field Supervisor: **Signature of Student**
